

IN THE SPECIFICATION

Please replace paragraph 6 with the following rewritten paragraph:

This invention generally relates to a method and system that can monitor and communicate events at plural target applications of an application unit by using at least one Dynamic Linked Library (DLL) shared among the plural target applications. DLL supports multiple data formats and multiple protocols to communicate the event data. The application unit can specify at least one protocol to be used to report the information in at least one format from the application unit. Each of the at least one protocol and each of the at least one format can be defined through the interface function.

Please replace paragraph 104 with the following rewritten paragraph:

Figures 16A and 16B are exemplary code embodiments corresponding to the Figure 14. Step 4 in the source code corresponds to getting the specified formatter (step 6 of the Figure 14), while step 5 of the source code formats the data (step 7 of the Figure 14).
